### DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

#### ***Drawings***

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

Additionally, the drawings are objected to because the different parts of each drawing are not designated with a numeral. Each numeral then needs to be referred to in the specification. The rationale for this requirement is that such labels aid in interpretation of the drawings and facilitate a faster and better quality search when the application is issued. This objection is being made in accordance with 37 CFR 1.83(a) which requires that the drawings show every feature of the invention specified in the claims.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

Claim 1 differs from the prior art by requiring a "first diffractive member [which transforms a] light beam emitted by [a] light source into [a] diffracted and . . . undiffracted beam [and a] second diffractive member [which receives] the diffracted light beam and [diffracts] the received light beam in a direction substantially parallel to [an] undiffracted light beam from the first diffractive member . . . ." U.S. Patent No. 5,552,879 to Takamiya et al. (hereinafter, "Takamiya") teaches the use of a single diffraction grating 10 for splitting a light beam into two beams but does not teach the use of a second diffraction member for further diffracting a diffracted beam. There is not teaching of a second diffraction member being used in an LDA system and, accordingly, the claim is allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The art has been cited to show the current state of the art of laser Doppler anemometry and laser Doppler velocimetry.
